RESTORATIVE

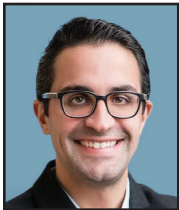

The Role of Bioactive Restorative Materials in Preserving and Helping to Rebuild Compromised Tooth Structure
Dr. Robert Lowe looks at the causes of decay around restorations and how bioactive materials can reduce the direct result of prolonged contact to bacterial metabolic biproducts (acids) with the tooth surface that demineralize enamel and dentin.

Freehand Direct Composite Diastema Closure: Creating the Illusion of Natural Proportions
Dr. Amey G. Patil shows us a minimally invasive composite layering technique using color modulation, opacity control, and facial transition line-angle design, with favorable clinical findings at approximately 23 months.

ENDODONTICS

Intentional Replantation of a Maxillary Molar: A One-Year Clinical and CBCT Followup
Dr. Chific Safi shows us a case report presenting the intentional replantation of a maxillary molar as a tooth-preserving treatment approach, with clinical and CBCT evaluation at one-year followup. The case highlights the healing response and periapical and periodontal outcomes observed following replantation.

IMPLANTS

Precision Lost and Found: Managing Full-Arch Failures in the Digital Era
Dr. Sam Simos follows a case that illustrates how early inaccuracies and analog limitations can compound into mechanical failure—and how digital precision, proper planning, and modern verification tools can restore both prosthetic integrity and patient trust.

PROSTHODONTICS

Optimizing Clinical Outcomes in the Full-Arch Surgical-Prosthodontics Process
Dr. John A. Sorensen asks, “What happens when nothing goes as planned in the full-arch surgical-prosthodontic process?” He shows us protocols designed for process improvement for situational adaptation, avoiding pitfalls, and optimizing clinical outcomes.

ALSO IN THIS ISSUE

QUICK TECHNIQUE
tells an abbreviated story of the techniques and products of today’s dental practice.

NEWS & TRENDS
highlights the latest in current affairs of interest to dental caregivers, including new legislation, news from state dental organizations, and national health trends.

FOCUS ON
covers trends and hot topics in dentistry of direct relevance to clinicians and their practices.

VIEWPOINT
shares expert opinions on developments in the dental industry and how they will affect dental practices now and in the future.

INDUSTRY NEWS
tracks trends in the dental manufacturing sector, such as mergers, acquisitions, corporate restructuring, and top-level managerial appointments.

SPECIAL PRODUCT SECTIONS

17th ANNUAL READERS’ CHOICE TOP 50 TECHNOLOGY PRODUCTS

This feature will cover the top 50 technology products that have appeared in *Dentistry Today* during the last year. It will focus on each product’s unique features.

Intraoral Cameras
This column will cover intraoral video cameras. Manufacturers will have the chance to convey what makes their cameras unique.

Dental Implant Systems
This section explores the variety of dental implant systems designed to help clinicians provide long-lasting, predictable results. The section will cover the benefits and features of some of the many implant products available today.

Space Reservations Open Through:
End of day Friday, October 23
